

ABHISHEK KUMAR

Bareilly, India | +91-6392461347 | k63abhishek@gmail.com | linkedin.com/in/k63abhishek

PROFESSIONAL SUMMARY

Software Developer with hands-on experience building full-stack web applications across Python, Django, React, and Node.js. Comfortable working on the full development lifecycle — from architecting data models and REST APIs to wiring up responsive front-ends and pushing to deployment. Built projects that combine AI-powered features, complete workflows, and data analytics.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java

Front-End: HTML5, CSS3, React.js, Responsive Web Design

Back-End: Django, Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Postman, AWS (Basics), VS Code

Core Competencies: API Integration, Debugging, Problem Solving, Technical Documentation, Team Collaboration

PROJECTS

AI Career Roadmap Generator | Python · AI APIs · React · MongoDB

- Designed and built an AI-powered web platform that generates personalized, step-by-step learning roadmaps based on a user's current skills and career goals.
- Integrated external AI APIs for intelligent content generation and used MongoDB to store user profiles, roadmap data, and progress history.
- Built responsive React interfaces with skill assessment forms, curated project recommendations, and structured learning-path visualizations.

Retail Sales Analysis | Python · Pandas · NumPy · Matplotlib

- Conducted Exploratory Data Analysis (EDA) on retail transaction datasets to surface revenue trends, seasonal patterns, and top-performing product categories.
- Produced business-ready visualizations using Matplotlib and statistical summaries using NumPy, translating raw data into clear, actionable insights.
- Structured findings into concise reports that reduced manual data review time and improved how decisions were made by the stakeholder team.

EDUCATION

Bachelor of Computer Applications (BCA)

Year: 2026

Invertis University, Uttar Pradesh, India

TRAINING

Full Stack Web Development Training

- Completed training covering front-end (HTML5, CSS3, JavaScript, React) and back-end (Node.js, Django) development with structured project-based assignments.
- Designed and deployed responsive multi-page web applications from scratch, applying both front-end and back-end skills in combination.
- Practiced Git-based version control and collaborated on shared codebases, reinforcing real-world development workflows.

ACHIEVEMENTS & INTERESTS

- Completed multiple end-to-end projects solo, personally handling requirements, development, testing, and deployment for each.
- Actively strengthening Data Structures & Algorithms skills as preparation for software engineering roles and technical interviews.
- Strong interest in AI integration, cloud-native development, and building software systems that are both scalable and maintainable.
